Applied Oerations & In such a case	
Action	Control
How to make tools	<p>There are resources brought from the earth and a crafting table in the strage next to the entrance of the Lander.</p> <p>Read the following for how to make tools.</p> <p>At first, open your inventory to put crafting table into the bar at the bottom and close the inventory to pick out it with mouse, you can take it in your hand.</p> <p>Then, right cliclk to set the crafting table on ground or wall. The second right click to use the crafting table, you can make tools with materials.</p>
It's so dark inside the lava cave. What should I do?	<p>You can make as many LED lights (Torch) as needed in the strage of the Lander, and Let's go out with them in your inventory (your own hand luggage). Right click to place them. They can be both floor and wall mounted. (Ceiling mount is not available.)</p>
I'm hungry.(I can no longer run.)	<p>When the right side meat mark at the bottom center of the screen falls below three, you will be too hungry to run, so you have to eat food. You can take spacefoods from the strage of the Lander in your Inventory, pick out spacefoods you'd like with mouse-wheel, and eat it with right click and holding. Without a further supply of spacefood in the lunar base, let's harvest the wheet and potato fields to make food before you eat up.</p>
Mine resources.	<p>To mine resources, tools necessary for mining (such as pickaxes) should be produced in the strage and placed in your inventory.(It is efficient to use pickaxe for stone category, shovels for sand category, and axe for wooden category.) You can mine/dig with bare hands, but that is slower.</p> <p>When mining/digging, type in /wb (Only the first time is required.), then hold down left click. Red and green ore can be mined by only iron pickaxe.</p> <p>If you need iron, let's try look out for iron block (ilmenite) on the lunar surface.</p>
